

Java

```
class Solution {  
    public int findMinDifference(List<String> timePoints) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string[]} timePoints  
 * @return {number}  
 */  
var findMinDifference = function(timePoints) {  
  
};
```

C++

```
class Solution {  
public:  
    int findMinDifference(vector<string>& timePoints) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int FindMinDifference(IList<string> timePoints) {  
  
    }  
}
```
